THIRTY-SECOND SEASON

1922

Wholesale Price List

Nineteen twenty-two will be the best year for fruit tree planting that the world has ever known.

At no other time has the demand been so great for fruit and fruit juices as it is right now, and will continue to be for the next several years to come.

The prospective future supply, instead of taking care of this constantly increasing demand, is falling far short, for people every day become aware of the fact that they will live longer and enjoy much better health, providing a goodly part of their diet is made up of the palatable deliciousness that grows on trees.

Ten years from now the man who planted trees in 1922 will be called "lucky," but he will know that it was good far-sight mixed with hard-headed common sense that caused him to take advantage of a wonderful opportunity to make money easier and faster than he had ever done before.

SOMETHING ABOUT THE MAN WHO IS NOW TALKING TO YOU

For the past forty years, ever since I was able to toddle between nursery rows, I have been continuously planting and propagating young fruit trees.

I know trees and how to grow them correctly as well as how to sell them honestly, or else I would have long ago been forced out of this business.

Every young tree is jealously watched and guarded while it is maturing and rigidly inspected before shipment, so that it can be thoroughly guaranteed to be true to name and arrive at its destination fresh and vigorous.

The trees you will buy from me this spring will be making money long after you and I have any more need for such a thing as gold or silver.

Yours for good luck,

JOHN W. FINN'S Wholesale Nurseries

TERMS: Cash with order, except with large orders, when satisfactory reference is given, and then the order must be accompanied by one-fourth cash.

BOXING AND PACKING: We box and pack all orders without charge.

SPRING PACKING SEASON: The spring packing and shipping season usually begins here about April 1st and continues into the month of May. The planting season is not regulated by any particular month or day, nor by the state of vegetation where planting is to be done, but by the condition of the trees to be planted. Hence, trees can be sent with safety from Dansville to localities several degrees south even if they do not arrive until after the ordinary transplanting season in that locality is past.

ORDERS SHOULD BE SENT IN as early as possible as I enter them for shipment in the order received. When sent early they are most sure of prompt attention and there is less danger of varieties being exhausted. **ORDER NOW**, do not wait until you are ready to plant. Your order will not be shipped until the proper time, or until you wish it.

SHIPPING FACILITIES: My nurseries are located on the main lines of the D. L. & W. and Erie Railroads. This gives the purchaser the benefit of inexpensive delivery.
